INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/03335

i.	Rasis	of the	report
B-	Dasis	OI UIC	1 CDC: L

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages							
	1-10	93	as originally filed					
	Claims, Numbers							
	1-27	•	as originally filed					
2.	With regard to the language , all the elements marked above were available or furnished to this Authority i language in which the international application was filed, unless otherwise indicated under this item.							
These elements were available or furnished to this Authority in the following language: , which i								
	under Rule 23.1(b)).							
		the language of publi	guage of publication of the international application (under Rule 48.3(b)).					
		the language of a tra Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary $oldsymbol{arphi}_3$).	examination (under				
3.	With inte	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:						
		contained in the inter	national application in written form.					
		furnished subsequen	tly to this Authority in written form.					
		furnished subsequen	itly to this Authority in computer readable form.					
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosion in the international application as filed has been furnished.							
		The statement that the listing has been furni	ne information recorded in computer readable form is identical t shed.	o the written sequence				
4.	The	amendments have re	esulted in the cancellation of:	·				
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).						
		(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)						
6.	Add	dditional observations, if necessary:

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 24 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 1) PATENT ABSTRACTS OF JAPAN vol. 016, no. 544 (C-1004), 13 November 1992 (1992-11-13) & JP 04 208267 A (MITSUI PETROCHEM IND LTD;OTHERS: 01), 29 July 1992 (1992-07-29) [D1] which concerns a different problem discloses a compounds /RN-Caplus-Nr. 145820-60-6 (cf. also paragraph "new material" of abstract) which is novelty destroying for the present claims 1, 2 and 4-12.
 - Therefore the subject-matter of present claims 1, 2 and 4-12 is not novel with respect to Article 33(2) PCT.
- US-A-5,919776 [D2] which also concerns modulators of chemokine recceptors 2) discloses aminoquinoline derivatives where the substituents at the amino residue may form a morpholine ring. However, the structural combination of a heterocyclic structure and a morpholino residue seperated by an urea group is not discloses in D2.
 - Since it was not predictable that compounds with such a structure which is quite different from the known one would in fact exhibit CCR3-binding properties as could be proved by the applicant (cf. present pages 34-37) the novel, searched subject-matter also involves an inventive step pursuant to Article 33(3) PCT.
- 3) For the assessment of the present claim 24 on the question whether it is

industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

- 4) WO-A-02 26723, which is an intermediate document and no document under Article 33(2) PCT, discloses compounds as such and a use thereof which are nearly all disclaimed from claim 1. However, the RN's as indicated in the search report are still novelty destroying for the indicated claims.
- 5) D2 which is a relevant prior art has to be cited in the description in accordance to Rule 5(1)(a)(ii) PCT.
